SUMMARY OF QUALIFICATIONS

Passionate and ambitious computer science student with a 3.8 GPA, certified in CompTIA CySA+, Security+ and Network+. Skilled in Java, Python, JavaScript, C, and cybersecurity tools (Splunk, Wireshark, Snort, etc). Strong multitasking and problem-solving abilities, with hands-on experience through at home labs on network security and system configuration.

EDUCATION & PROFESSIONAL EXPERIENCE

Bachelor's Degree – Central Connecticut State University (Expected Graduation: May 2027)

Computer Science | GPA 3.8

Google Cybersecurity Professional

CompTIA Network+, Security+, CYSA+

Microsoft SC-900

TryHackMe SOC Level 1 and 2, Junior Pen Tester (See more in portfolio)

TECHNICAL SKILLS

Languages/Systems: Java, Python, JavaScript, C, SQL, Assembly, Linux, Windows, macOS

Cybersecurity Skills: Firewall Configuration, Traffic Analysis, Threat Detection, Threat Intelligence, Pyramid of Pain, Cyber Kill Chain, Incident Response, IAM, Risk Assessment

Cybersecurity Tools: Splunk, Wireshark, Snort, pfSense, Defender, Purview, Entra, Autopsy

EXPERIENCE

At-Home Cybersecurity Lab

Designed and maintained a home-based cybersecurity lab to gain hands-on experience. Configured and managed pfSense firewall, Snort IDS, and pfBlockerNG. Conducted traffic analysis, vulnerability scanning, and network segmentation. Gained practical experience in monitoring, detecting, and responding to simulated threats in a virtualized environment

Help Desk Technician

Nwaj Tech – Durham, CT (Hybrid) | August 2025 – Present

Provide technical support across Windows and Mac environments, troubleshooting hardware, software, and network issues. Manage user onboarding, access control, patching, and system maintenance in alignment with Zero Trust and compliance standards. Monitor for potential vulnerabilities, document incidents, and assist with maintaining endpoint protection and data integrity. Deliver responsive support while reinforcing cybersecurity best practices.
